Abrasive Wheels

T. +44 (0) 3332 244586

Does your workforce know how to use Abrasive Wheels safely?

Those using abrasive wheel machinery must be fully trained and able to operate equipment safely.

Every year, thousands of people suffer at the hands of Abrasive Wheel injuries in the workplace. Staff can almost always avoid these injuries if they have received training in the safe use of Abrasive Wheels.

Who is our Abrasive Wheel training for?

If you use Abrasive Wheel machinery but haven't been shown how to safely mount or use the equipment, this course is for you.

With us, you can develop your training in the safe use and working practices of Abrasive Wheels.

What does the course cover?

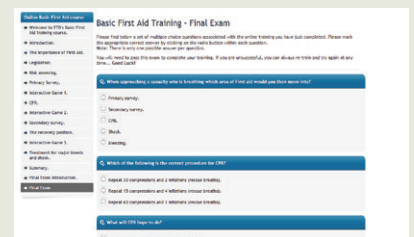

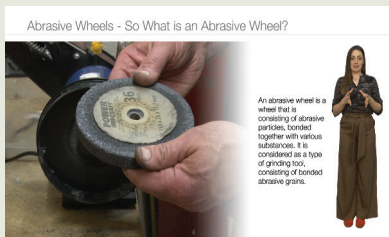

The Abrasive Wheels course shows you:

- How to safely operate machinery that performs cutting and grinding with discs and wheels.
- The dangers involved with Abrasive Wheel machinery.
- How to prevent injury and death when performing dangerous tasks with Abrasive Wheels.

What is the benefit to your business?

Your staff will learn the basic principles of using Abrasive Wheels in the workplace to promote safety and respond effectively in the event of someone falling critically ill.

Staff can complete their training at any time to suit your needs.

Video Presentations.

Interactive Games.

Final Exam – Certificates Provided.

“This course is not designed to replace formal practical training but provides an excellent guide to refreshing your knowledge and updating your skills.”
