

# Slips and Trips

T. +44 (0) 3332 244586

### **Has your workforce received sufficient training in slips and trips?**

Slips and trips are the most common of workplace hazards – they make up over a third of all major injuries. More than 10,000 workers suffered serious injuries because of slips and trips last year. 95% of major slips resulted in broken bones.

All employees need sufficient slips and trips training in the workplace.

HSE Executive

### **Who is slips and trips training for?**

Slips and trips can happen anywhere.

Whether your staff work in an office, school, factory, shop or construction site, this online course is for you.

### **What does the slips and trips course cover?**

The slips and trips course covers:

- The importance of risk assessments.
- Factors that contribute to slips and trips.
- Hazards staff should be aware of.
- Workplace legislation that protects against slips and trips.

### **What is the benefit of slips and trips training in your business?**

By taking the slips and trips course, your staff will be able to reduce potential hazards to minimise the risk of staff slipping or tripping while at work. By helping to prevent injuries, you can care for both the safety of your staff and the health of your business. Staff can complete their training at any time to suit your needs.

Video Presentations.

Interactive Games.

Final Exam – Certificates Provided.

**Your staff can slip or trip at any time in any place. Slips often happen where there is too little traction between the foot and the floor, where the surface may be wet or oily or where a rug or a mat is unanchored. Our course identifies common factors contributing to slips and trips in the workplace and provides training to limit the risks of injury.**
