# Safer Patient Handling

T. +44 (0) 3332 244586

### **Has your workforce received sufficient training in safer patient handling?**

*Workplace manual handling causes over a third of injuries that extend over 3 days, and the number of musculoskeletal injuries in the healthcare sector is enormous.*

*This is why all healthcare employees need training in how to safely handle patients.*

**HSE Executive**

### **Who is safer patient handling training for?**

*Patient handling training is a necessity for any healthcare organisation.*

*This safer patient handling course will help professionals to safely care for those in our communities.*

*Staff working in hospitals, hospices, nursing or care homes, or around the community in patients' homes and social residences will benefit from this training*

### **What does the safer patient handling course cover?**

*The safer patient handling course covers:*

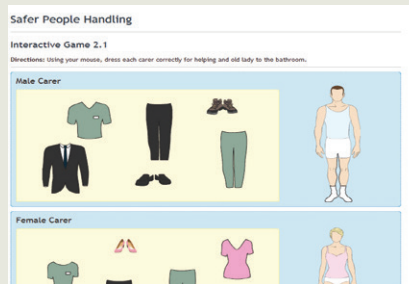

- *How to handle people with dignity and care.*
- *How to reduce the risk of injury to yourself and service users.*

### **What is the benefit of safer patient handling training for your business?**

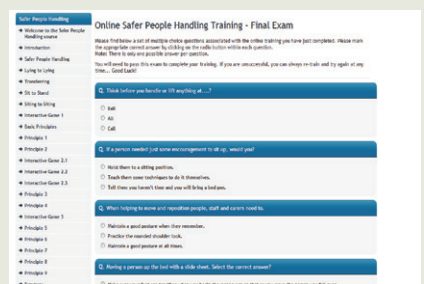

*This course seeks to redress the huge proportion of musculoskeletal injuries by teaching sound knowledge and understanding of safer patient handling to healthcare staff. Service providers can protect their welfare and the welfare of others if they understand how easily the spine can be damaged and how to implement healthcare principles to improve health and safety. Staff can complete their training at any time to suit your needs.*
